Firewalli

Affordable, smart firewall rules analysis and compliance made ***simple.***

Overview

Firewalli helps security engineers and IT teams simplify firewall rule management across multiple technologies. By providing a vendor-agnostic platform, it ensures rules are consistent, compliant, and free from misconfigurations reducing the risk of breaches and failed audits.

Core Features

- Automated parsing and normalization of firewall rule sets
- Compliance policy templates (PCI DSS, ISO 27001, NIST CSF)
- Custom risk scoring engine with clear remediation guidance
- Rule lifecycle management (create, review, approve, retire)
- Exportable audit reports (PDF/CSV)

Key Benefits

Accelerate security reviews
Cut firewall rule audit times by up to **70%.**

Improve compliance
Map rules directly to **ISO, PCI DSS,** and **NIST** standards.

Reduce risk effectively
Identify overly permissive rules and shadow policies **instantly.**

Boost cost-savings
Streamline manual review cycles, **reduce audit** preparation **hours.**

Vendor-neutral service
Works across your **entire organisation.**

Use Cases

Enterprises:
Centralise and standardize firewall rule review management across business units.

SMBs:
Prepare for compliance audits with simplified rule reviews.

MSPs:
Deliver consistent firewall governance as a managed service.
